## Connections

## Ledger Board Connections

1. Where supported by attachment to an exterior wall, decks shall be positively anchored to the primary structure.
2. Ledger boards shall be equal to or greater than the joist depth.
3. Ledger boards shall not be attached to veneers - brick, stone, masonry; or to cantilevered floors or windows.
4. Exterior finish (siding) shall be removed prior to the placement of a ledger board.
5. Continuous flashing is required when the ledger board is attached to wood-framed construction.
6. Type of Fasteners:
A. Lag Screws: Lag screws shall be hot-dipped galvanized or stainless steel with a $1 / 2$ inch minimum diameter and installed with washers.
B. Expansion Anchors: Expansion anchors, $1 / 2$ inch diameter bolt or threaded rod minimum, equipped with washers installed according to the manufacturer's installation instructions.
C. Adhesive Anchors: Adhesive anchors (Hilti-HY-70; Red Head - Epcon A7) minimum ½ inch threaded rod with washers shall be used for concrete, solid or hollow masonry. Adhesive cartridges must remain on jobsite for inspector verification.
D. Wood Screws: Wood screws (FastenMaster - Ledgerlok; SimpsonStrong Tie-StrongDrive Screws (SDS, SDW) with a minimum $1 / 4$ inch diameter may be used to attach to wood frame construction.
