P24-13
Lafayette Quarters Multi-Family Residential

Property Owner: Medina Metropolitan Housing Authority
Applicant: Brian Grambort
Location: 881 Lafayette Road with Parcel Number 028-19C-08-134
Zoning: C-3 (General Commercial)
Request: Conditional Zoning Certificate and Site Plan approval for a multi-family residential building

LOCATION AND SURROUNDING USES

The subject site is composed of 0.89 acres located on the north side of Lafayette Road, west of Independence Drive. Adjacent properties contain the following uses and zoning:

- North – Juvenile Detention (I-1)
- East – Juvenile Court Annex (I-1)
- South – Two-Family Residential (R-3)
- West – Veterinary Clinic (I-1)

BACKGROUND & PROPOSED APPLICATION

In June of 2022, City Council approved a rezoning of the property from I-1 (Industrial) to C-3 (General Commercial). Prior to City Council's action, the Planning Commission recommended approval of the rezoning in March of 2022. Though not required with the rezoning request, a conceptual plan was included by the applicant indicating a multi-family residential building designed for individuals at risk of homelessness with 11 units.

The current Site Plan and Conditional Zoning Certificate applications propose the construction of an 8,799 sq. ft. 11 unit multi-family residential building designed for individuals at risk of homelessness. The applicant has also indicated that a unit will be occupied by a staff person and the building will include a meeting room, counseling space, and an administrative office.

CONDITIONAL ZONING CERTIFICATE

Per Section 1137.03, a “Multi-Family Dwelling” is a conditionally permitted use in the C-3 zoning district. The use includes the following Conditionally Permitted use regulations found in Section 1153.04:

- (5) No lighting shall constitute a nuisance or shall in any way impair safe movement of traffic on any street or highway. No lighting shall shine directly on adjacent properties.
- (11) Such uses should be properly landscaped to be harmonious with surrounding uses, especially if residential uses.
- (14) Special provisions for group dwellings:
 - A. Group dwellings shall be considered as one building for the purpose of determining front, side and rear yard requirements; the entire group as a unit requiring one front and rear and two (2) side yards as specified for dwellings in the appropriate district.
 - B. Each two (2) or two and one-half (2½) story group dwelling development shall have a minimum court of forty (40) feet in width and forty (40) feet in length, in addition to its required yards, and each one story group dwelling development shall have a minimum court of thirty (30) feet in width and thirty (30) feet in length, in addition to its required yards.
 - C. In a group dwelling development, no two (2) separate dwelling structures shall be closer than fifteen (15) feet to each other along the sides or end of a court.
 - D. The court shall be unoccupied by any building or other structures, except fire hydrants, utility poles or other street improvements.
 - E. The court shall have an unobstructed opening, not less than thirty (30) feet wide, onto the front yard of a lot which has a width not less than that required in the district in which it is located.
- (19) All activities, programs and other events shall be adequately and properly supervised so as to prevent any hazard and to assure against any disturbance or nuisance to surrounding properties, residents or to the community in general.

Conditional Zoning Certificate Basis of Determination

The Planning Commission shall establish beyond reasonable doubt that the general standards and the specific standards pertinent to each use indicated herein are satisfied by the completion and operation of the proposed development. The Planning Commission may also impose such additional conditions and safeguards deemed necessary for the general welfare, for the protection of individual property rights and for the insuring that the intent and objectives of this Zoning Ordinance will be observed.

The Planning Commission shall review the particular facts and circumstances of each proposed use in terms of the following standards and shall find adequate evidence showing that such use on the proposed location:

- (1) Will be harmonious with and in accordance with the general objectives or with any specific objectives of the Land Use and Thoroughfare Plan of current adoption;
- (2) Will be designed, constructed, operated and maintained so as to be harmonious and appropriate in appearance with the existing or intended character of the general vicinity and that such use will not change the essential character of the same area;
- (3) Will not be hazardous or disturbing to existing or future neighboring uses;
- (4) Will not be detrimental to property in the immediate vicinity or to the community as a whole;

- (5) Will be served adequately by essential public facilities and services such as highways, streets, police and fire protection drainage structures, refuse disposal and schools; or that the persons or agencies responsible for the establishment of the proposed use shall be able to provide such service adequately;
- (6) Will be in compliance with State, County and City regulations;
- (7) Will have vehicular approaches to the property which shall be so designed as not to create an interference with traffic or surrounding public streets or roads.

SITE PLAN

Development Standards

The following table indicates the general development standard requirements of the C-3 zoning district, previously noted Conditional Zoning Certificate Regulations, and applicable R-4 requirements applied per Section 1137.10:

	Required	Proposed
Minimum Lot Size per Dwelling Unit	5,400 sq. ft.	3,524 sq. ft.
Minimum Lot Width	100 ft.	270 ft.
Minimum Front Setback	40 ft.	41 ft.
Minimum Side Setback	5 ft.	16 ft.
Minimum Rear Setback	5 ft.	31 ft.
Maximum Height	35 ft.	16 ft.
Maximum Lot Coverage	60%	40%
Minimum Open Space	25%	33%
Minimum Floor Area (1 Bedroom)	700 sq. ft.	569 sq. ft.

The proposed maximum density is 5,400 sq. ft. of lot area per unit. As noted above, the minimum lot size is not met for the proposed number of units. Another way of stating the requirement is that 7.2 units are permitted on the site and the applicant is proposing 11 units.

The minimum floor area for the one bedroom units is not met as each of the 11 units is 569 sq. ft., which totals 6,259 sq. ft. of the building. However, the remaining 2,540 sq. ft. of the building includes a laundry, property manager office, meeting room, mechanical room, trash area, janitor’s closet, common restroom, mail room, and hallways. Incorporating the entire footprint of the building would result in 800 sq. ft. of area per unit.

The applicant has filed a variance application to the Board of Zoning Appeals regarding these requirements.

Parking, Access, and Circulation

Access and Circulation – The site is accessed by a single drive off of Lafayette Road, which is compliant with dimensional requirements. On site traffic is two way, which accesses parking spaces and the east side of the building.

Off-Street Parking – Parking for a multi-family residential use requires 2 spaces for each dwelling unit plus 1 space for each 5 dwelling units for visitor parking. The subject 11 unit building therefore requires 24 parking spaces.

11 parking spaces are shown with an additional 13 spaces “land banked” for a total of 24 spaces. Land banked spaces must be in an undeveloped area and parking spaces must be constructed if city staff determines such

spaces are necessary. Land banked parking spaces for the subject residential use are also shown in the front yard, which requires approval by the Planning Commission per Section 1145.05(c)(2). Land banked parking spaces are indicated at the required 10 ft. setback from the right-of-way.

Parking spaces and aisles meet the dimensional requirements of Section 1145.08, which requires 9 ft. x 19 ft. 90-degree spaces with 24 ft. two-way aisles.

Sidewalk – A public sidewalk is not proposed along the frontage of the lot. The City Engineer has the authority to require sidewalks, however, a public sidewalk does not exist on the north side of Lafayette Road in the area or on Independence Drive.

Landscaping, Screening, and Buffering

Parking Lot Landscaping – Landscape features or other visual barriers are required between parking and the right-of-way. Plans show landscaping between the parking lot and the right-of-way. Interior parking lot landscaping is provided at the required 5 sq. ft. per 100 sq. ft. of parking area.

In the event land banked parking spaces are required, the spaces must meet the landscaping requirements of Section 1145.09(b).

Buffering and Screening – Landscape features or other visual barriers are not required for the site. However, landscaping is provided on all sides of the site including to the north from the existing Juvenile Detention Center.

Trash Enclosure – A trash enclosure is shown to the rear of the building in compliance with Section 1155.05.

Utilities

Water and sanitary sewer are available from Lafayette Road. A storm water basin is located in the northeast corner of the site.

Engineering Department Comments

The Medina Engineering Department has reviewed the revised plans and has provided the attached comments. In general, the Engineering Department has required a typical Storm Water Operations and Management Agreement with the city, noted the water meter vault must meet city requirements, and required that the drive apron must be concrete.

Fire Department Comments

The Medina Fire Department has reviewed the application and does not have any comments at this time.

Building Elevations and Lighting

Architectural plans incorporate a building exterior with a variety of colors, materials, and roof lines. The exterior of the building includes lap siding, shake siding brick veneer, and stone veneer. In addition, the front and sides of the building incorporate a large amount of window area. The building has a pitched asphalt roof, which is similar to buildings in the area.

Lighting is compliant with Section 1145.09(c) including a photometric plan, full cut-off fixtures, and a maximum lighting height of 25 ft.

Site Plan Review Standards

The Planning Commission's review and action shall be based on the following Standards per Section 1109.02(c):

- (1) The site plan shows that a proper relationship does exist between thoroughfares, service roads, driveways and parking areas to encourage pedestrian and vehicular traffic safety.
- (2) All the development features including the principal buildings, open spaces, service roads, driveways and parking areas are so located and related as to minimize the possibility of any adverse effects upon adjacent development.
- (3) The site plan includes adequate provision for the screening of parking areas, service areas and active recreation areas from surrounding properties by landscaping and/or ornamental walls or fences. All trees planted shall be as found in specifications approved by the Shade Tree Commission.
- (4) Grading and surface drainage provisions are reviewed and approved by the City Engineer.
- (5) The design and construction standards of all private streets, driveways and parking areas are to be built following approval of plans by the City Engineer according to construction standards specified in the Codified Ordinances.
- (6) Maximum possible privacy for multi-family dwellings and surrounding residential properties shall be provided through good design and use of proper building materials and landscaping. Visual privacy should be provided through structural screening and landscaping treatment. Auditory privacy in multi-family dwellings should be provided through soundproofing. All trees planted shall be as found in specifications approved by the Shade Tree Commission.
- (7) The architectural design of buildings should be developed with consideration given to the relationship of adjacent development in terms of building height, mass, texture, materials, line and pattern and character.
- (8) Building location and placement should be developed with consideration given to minimizing removal of trees and change of topography. Any trees to be removed which are planted in a public right-of-way or on municipal property shall be reviewed by the Shade Tree Commission.
- (9) In multi-family developments, television and other antennas shall be centralized.
- (10) On-site circulation shall be designed to make possible adequate fire and police protection.
- (11) Off-street parking facilities shall be provided in accordance with Chapter 1145. In large parking areas, visual relief shall be provided through the use of tree planted and landscaped dividers, islands and walkways. In multi-family developments no parking or service areas shall be permitted between any street and the main building. All trees planted shall be as found in specifications approved by the Shade Tree Commission.
- (12) Signs shall be provided in accordance with these Codified Ordinances.
- (13) Any trees planted on site shall be on approved list of Shade Tree Commission and planted in accordance with Commission standards.

COMMUNITY DEVELOPMENT DEPARTMENT STAFF RECOMMENDATION

Staff recommends approval of Site Plan and Conditional Zoning Certificate application P24-13 with the following conditions:

1. Land banked parking spaces shall be installed by the property owner if determined to be necessary by the City of Medina and shall meet the landscaping requirements of Section 1145.09(b).
2. The project shall comply with Planning and Zoning Code Section 1137.10 regarding the maximum lot size per dwelling unit and dwelling unit size or a variance shall be approved by the Board of Zoning Appeals.

Subject: FW: Site Plan Review
Attachments: P24-13 File 5-9-24.pdf; Engineering Checklist for Commercial Site Plan.pdf

My comments for the attached:

1. Please refer to the attached engineering checklist for site plan approval.
2. The owner will be required to enter into a Storm Water Operations and Management Agreement with the City. This agreement will be recorded with the property.
3. The water meter vault shall meet the requirements of the City of Medina Water Department.
4. The drive apron must be concrete and must meet the City of Medina Engineering Department standards.

Subject: Conditional Zoning Variance of 881 Lafayette Rd

Dear Andrew Dutton,

I received a letter regarding the Conditional Zoning Certificate for a multi-family residential building at the address listed in the Subject.

I will not be able to attend this meeting in person.

I am opposed to the variances requested. It is already detrimental to property values having to deal with the road noise. The variances proposed would exacerbate the problem.

The Lafayette PROJECT SUMMARY

The Lafayette is an 11-unit new construction one-story apartment building located at 881 Lafayette Road in Medina, Ohio and designated for individuals at risk of homelessness. The Lafayette will be developed and managed by the Medina Metropolitan Housing Authority and owned by the Brunswick Housing Development Corporation. The Lafayette will reserve one unit for an on-site staff person to assist with property management and resident services, and residents will be provided comprehensive, wrap-around case management services to enhance their quality of life and address the root causes of the housing crisis they faced.

New construction building will be approximately 8,799 SF gross with typical one-bedroom apartments at 569 SF gross. Building areas will include resident meeting room, counseling space, administrative office, and staff and building support spaces.

The development will be designed and constructed to comply with current model codes as adopted by the State of Ohio, ICC A117.1 – 2017, and NGBS Bronze requirements.

Site Address: 881 Medina Road, Medina, Ohio 44256

Site Parcel ID: 028-19C-08-134

Site Area Total: 1.08 Acres (47,054 SF)

Site Area Right-of-Way: 0.19 Acres (8,334 SF)

Site Area Open Space (Paved and Green): 0.69 Acres (29,921 SF)

Site Area Residential Use: 0.2 Acres (8,799 SF)

GENERAL PLAN NOTES

- ALL EXTERIOR DIMENSIONS ARE TO EXTERIOR FACE OF STUDS OR MASONRY
- ALL INTERIOR DIMENSIONS ARE TO FACE OF FINISH MATERIAL
- COORDINATE SIZE AND LOCATION OF MECHANICAL AND ELECTRICAL EQUIPMENT, ROUTING OF UTILITIES, PADS, PENETRATIONS, AND SUPPORTS BETWEEN ARCHITECTURAL, MECHANICAL, PLUMBING, AND ELECTRICAL DRAWINGS
- SLOPE FLOORS TO DRAINS AT 1/8" PER FOOT
- BUILDING SHALL BE EQUIPPED WITH AN AUTOMATIC SPRINKLER SYSTEM THROUGHOUT IN ACCORDANCE WITH NFPA 13R
- ALL SUITES ARE TO FOLLOW TYPICAL UITE DIMENSIONS UNLESS NOTED OTHERWISE
- ANGLE BETWEEN EAST 111TH STREET BUILDING AXIS SHALL BE - DEGREES
- CONTRACTOR SHALL DESIGN AND PROVIDE A COMPLETE PASSIVE RADON MITIGATION- SUB-SLAB DEPRESSURIZATION (SSD) SYSTEM, AND PERFORM PRE-OCCUPANCY TESTING FOR RADON GAS. SYSTEM SHALL BE DESIGNED AND INSTALLED TO COMPLY WITH APPLICABLE PROCEDURES IDENTIFIED IN APPLICABLE FEDERAL, STATE, AND LOCAL RULES AND REGULATIONS INCLUDING, BUT NOT LIMITED TO OHIO REVISED CODE SECTION 3723.02. CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING NECESSARY PERMITS AND APPROVALS FOR RELATED WORK AND FACILITIES. REFER TO SPECIFICATION 312113 'RADON MITIGATION' FOR ADDITIONAL REQUIREMENTS.
- REFERENCE FOR THE FOLLOWING TYPICAL INFORMATION:
 - A-XXX DETAILS OF INTERSECTIONS BETWEEN FIRE RESISTANCE RATED PARTITIONS AND NON-FIRE RESISTANCE RATED PARTITIONS
 - A-XXX FIRE-RESISTANCE RATED ASSEMBLY CONTINUITY AT BATHTUBS
 - A-110 ROOF FLASHING DETAILS
- WHERE  SYMBOL IS INDICATED, PROVIDE ACCESSIBLE UNIT.
- WHERE  SYMBOL IS INDICATED, PROVIDE FEATURES FOR RESIDENTS WITH AUDIO/VISUAL IMPAIRMENTS. REFERENCE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.
- PROVIDE FIRE EXTINGUISHER WERE F.E.C. IS INDICATED.
- ALL STRUCTURAL STEEL SHALL BE INDIVIDUALLY ENCASED IN 1 HR RATED CONSTRUCTION. REFER TO UL X528 & X524.
- FIREBLOCKING SHALL CONSIST OF THE FOLLOWING:
 - 2 INCH NOMINAL LUMBER
 - ONE THICKNESS OF .75 INCH PARTICLEBOARD (OR WOOD STRUCTURAL PANELS) WITH JOINTS BACKED BY .719 INCH IN KIND MATERIAL
 - 0.5 INCH OF GYPSUM BOARD
 - 0.25 INCH OF CEMENT BASED MILLBOARD
 - BATTS OR BLANKETS OF MINERAL WOOD, OR MINERAL FIBER.
- FIREBLOCKING SHALL MINIMALLY BE PROVIDED IN THE FOLLOW LOCATIONS:
 - CONCEALED SPACES OF STUD WALLS AND PARTITIONS, FURRED SPACES, AND PARALLEL ROWS OF STUDS OR STAGGERED STUDS AS FOLLOWS:
 - VERTICALLY AT THE CEILING AND FLOOR LEVELS.
 - HORIZONTALLY AT INTERVALS NOT EXCEEDING 10 FEET.
 - INTERCONNECTIONS BETWEEN CONCEALED VERTICAL STUD WALL OR PARTITION SPACES AND CONCEALED HORIZONTAL SPACES CREATED BY AN ASSEMBLY OF FLOOR JOISTS OR TRUSSES, AND BETWEEN CONCEALED VERTICAL AND HORIZONTAL SPACES SUCH AS OCCUR AT SOFFITS, DROP CEILINGS, COVE CEILINGS AND SIMILAR LOCATIONS.
 - CONCEALED SPACES BETWEEN STAIR STRINGERS AT THE TOP AND BOTTOM OF THE RUN.
 - FLOOR PENETRATIONS CONTAINED AND LOCATED WITHIN THE CAVITY OF A WALL.
 - ANNULAR SPACE AROUND VENTS, PIPES, DUCTS, AT CEILINGS AND FLOOR LEVELS.
 - WITHIN CONCEALED SPACES OF EXTERIOR WALL COVERINGS AND OTHER EXTERIOR ARCHITECTURAL ELEMENTS WHERE ERECTED WITH COMBUSTIBLE FRAMES. FIREBLOCKING SHALL BE INSTALLED AT MAX INTERVALS OF 20 FEET IN EITHER DIRECTION WITH NO CONCEALED SPACE EXCEEDING 100 SF. WHERE WOOD FURRING STRIPS ARE USED, THEY SHALL BE OF APPROVED WOOD OF NATURAL DECAY RESISTANCE OR PRESERVATIVE-TREATED WOOD. IF NON-CONTINUOUS, SUCH ELEMENTS SHALL HAVE CLOSED ENDS, WITH NOT LESS THAN 4 INCHES OF SEPARATION BETWEEN SECTIONS
- PROVIDE DRAFTSTOPPING CONSISTING OF THE FOLLOWING:
 - 0.5 INCH GYPSUM BOARD
 - 0.375 INCH WOOD STRUCTURAL PANEL
 - 0.375 INCH PARTICLE BOARD
 - 1 INCH NOMINAL LUMBER
 - CEMENT FIBERBOARD
 - BATTS OR BLANKETS OF MINERAL WOOL OR GLASS FIBER OR OTHER MATERIAL ADEQUATELY SUPPORTED
- PROVIDE DRAFTSTOPPING IN THE FOLLOWING LOCATIONS:
 - IN FLOOR/CEILING ASSEMBLIES ABOVE AND IN LINE WITH DWELLING UNIT SEPARATIONS
 - IN ROOF/CEILING ASSEMBLIES AS INDICATED ON A-105 ROOF PLAN.

SITE PLAN GENERAL NOTES:

- 1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION.
- 2. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL WORK WITH OTHER TRADES.
- 3. WHERE THE UTILITY TRANSFORMER, SWITCHING AND/OR METERING EQUIPMENT SHALL BE INSTALLED PAD-MOUNTED IN A PAVED AREA ACCESSIBLE TO VEHICULAR TRAFFIC, THE ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL CONCRETE FILLED BOLLARDS AROUND ALL SUCH ELECTRICAL EQUIPMENT. PROVIDE BOLLARDS AT ALL ACCESSIBLE CORNERS OF EQUIPMENT WITH ADDITIONAL BOLLARDS IN BETWEEN AS REQUIRED FOR A MAXIMUM SPACING OF 4'-0" O.C. VERIFY EXACT LOCATION OF BOLLARDS WITH ENGINEER PRIOR TO INSTALLATION. MAINTAIN ALL REQUIRED CLEARANCE AND ACCESS REQUIREMENTS PER POWER COMPANY, CODE AND LOCAL AUTHORITY HAVING JURISDICTION. REFER TO BOLLARD DETAIL ON SHEET E-002.
- 4. MINIMUM UNDERGROUND CONDUIT SIZE SHALL BE 1 INCH, UNLESS OTHERWISE INDICATED.
- 5. TELEPHONE, DATA, CABLE TV, AND ELECTRIC UTILITY DUCT BANKS SHALL BE INSTALLED PER RESPECTIVE UTILITY COMPANY'S REQUIREMENTS.
- 6. CAP ALL CONDUIT STUBS AND MARK ENDS WITH IRON PINS.
- 7. PROVIDE PULL-WIRE IN ALL DUCT BANKS.
- 8. PROVIDE METALLIC MARKING TAPE OVER ALL DUCTS/DUCTBANKS.
- 9. TOP OF ELECTRICAL DUCT BANK SHALL BE A MINIMUM OF 36" BELOW FINISHED GRADE. TOP OF TELEPHONE, DATA, CABLE TV (COMMUNICATIONS) DUCT BANKS SHALL BE A MINIMUM OF 24" BELOW FINISHED GRADE, UNLESS OTHERWISE REQUIRED BY RESPECTIVE UTILITY COMPANIES.
- 10. CONCRETE ENCASE DUCT BANKS AND/OR CONDUIT WHERE ROUTED UNDER DRIVEWAYS, ROADWAYS OR PARKING AREAS.
- 11. COORDINATE ROUTING AND INSTALLATION OF PROPOSED ELECTRIC PRIMARY, ELECTRIC SECONDARY, AND COMMUNICATION DUCTBANKS. WHERE DUCTBANKS CROSS PATHS MAKE NECESSARY ADJUSTMENTS TO BURIAL DEPTH AND DUCTBANK CONFIGURATION TO MAINTAIN CODE REQUIRED DEPTHS FROM TOP OF DUCTBANK TO FINISHED GRADE.
- 12. CONTRACTOR SHALL OBTAIN THE SERVICES OF A LICENSED SURVEYOR TO IDENTIFY, COORDINATE AND RECORD EXACT LOCATIONS OF UNDERGROUND UTILITIES. RECORD DRAWINGS (HARD COPIES AND ELECTRONIC CAD FILES) SHALL BE PROVIDED TO OWNER. REFERENCE CIVIL UTILITY PLANS FOR SITE UTILITY DESIGN INFORMATION. COORDINATE WORK WITH OTHER TRADES.
- 13. ALL TRENCHING AND BACKFILLING ASSOCIATED WITH ELECTRICAL WORK SHALL BE INCLUDED IN THE ELECTRICAL CONTRACTORS BID.
- 14. WHERE DEVICES AND EQUIPMENT ARE SUBJECT TO WATER AND OR MOISTURE, THE DEVICE OR ASSOCIATED CIRCUIT SHALL BE GFI PROTECTED. EQUIPMENT ENCLOSURES SHALL BE NEMA 3R RATED AT A MINIMUM.
- 15. REFERENCE SITE ELECTRICAL NOTES, DRAWING E-002.
- 16. COORDINATE FINAL LOCATION OF ALL ELECTRICAL DEVICES AND EQUIPMENT WITHIN LANDSCAPED AND HARDSCAPED AREAS WITH ARCHITECT AND LANDSCAPE/HARDSCAPE ARCHITECT DRAWINGS PRIOR TO INSTALLATION.
- 17. REFER TO ONE-LINE DIAGRAM ON SHEET E-002 FOR CONDUIT SIZES AND QUANTITIES ASSOCIATED WITH THE UNDERGROUND PRIMARY AND SECONDARY SERVICE LATERAL DUCT BANKS.
- 18. ALL CONDUIT IN UNDERGROUND DUCT BANKS SHALL BE SUPPORTED WITH BASE AND INTERMEDIATE DUCT SPACERS.

SITE LOW VOLTAGE/TECHNOLOGY SYSTEM PATHWAY REQUIREMENTS:

- 1. CONDUIT RUNS FOR UNDERGROUND DUCT BANKS MAY EXTEND 300 FEET (MAX) BEFORE A PULL BOX, HAND HOLE OR MANHOLE IS REQUIRED.
- 2. PROVIDE PULL BOX, HAND HOLE OR MANHOLE AFTER EVERY TWO (2) 90 DEGREE BENDS OR 180 DEGREES OF BENDS, INCLUDING OFFSETS.
- 3. BENDS TO BE LONG-SWEEP BENDS, BUT IN NO CASE SHALL A BEND BE LESS THAN 10 TIMES OUTSIDE DIAMETER OF CONDUIT.
- 4. ALL 90 DEGREE BENDS TO BE EITHER PVC CONCRETE ENCASED OR GALVANIZED RIGID STEEL.
- 5. SLOPE CONDUITS AWAY FROM BUILDING TOWARD MANHOLE OR HAND HOLE.
- 6. PVC DUCT SHALL STOP 5 FEET FROM CONCRETE MANHOLE AND TRANSITION TO RIGID GALVANIZED STEEL CONDUIT TO PENETRATE MANHOLE. ALTERNATIVELY, IF PVC CONDUIT PROCEEDS TO MANHOLE, CONCRETE DUCT SHALL BE PINNED WITH REBAR TO MANHOLE FACE TO PREVENT SHEARING OR SEPARATION OF DUCT FROM MANHOLE.
- 7. CONCRETE DUCT ENCASED CONDUIT SHALL BE PINNED TO FOUNDATION WALL TO PREVENT SHEARING.
- 8. WHERE SMALLER HAND HOLES ARE USED, CONCRETE AND PINNING ARE NOT REQUIRED.
- 9. FLEXIBLE NONMETALLIC INNERDUCT AND FITTINGS SHALL BE USED:
 - A. TO SEGMENT CONDUITS
 - B. AS PROTECTION TO FIBER OPTIC CABLES WHEN INSTALLED IN CABLE TRAY OR BUILDING STRUCTURE.
 - C. S PROTECTION TO FIBER OPTIC CABLES WITHIN MDF AND TRS
- 10. INNERDUCT SHALL EXTEND TO EQUIPMENT RACKS AT SYSTEM ENDPOINTS.
- 11. WHERE NOT INSTALLED IN CONTINUOUS LENGTH, SPLICE INNERDUCT SEGMENTS USING COUPLINGS DESIGNED FOR THAT PURPOSE.
- 12. EMPTY INNERDUCT SHALL BE EQUIPPED WITH PULL CORD AND CAPPED AT BOTH ENDS. PULL CORD TO EXTEND BEYOND CAP FOR ACCESSIBILITY. PULL CORD TO BE LABELED AT EACH END.

EXTERIOR LIGHTING NOTE:
ALL EXTERIOR LIGHTING SHALL BE CONTROLLED VIA PHOTOCELL AND TIME OF DAY THROUGH A LIGHT LIGHTING CONTROL SYSTEM. E.C. SHALL PROVIDE ALL COMPONENTS REQUIRED FOR INTERCONNECTION OF FIXTURE TO LIGHTING CONTROL SYSTEM. REFER TO LIGHTING CONTROL DIAGRAM 'A' ON SHEET E-002.

NOTE:
REFER TO ADDITIONAL NOTES AND DETAILS ON SHEET E-002.

DESCRIPTION

LED technology combined with the Icon luminaires unique form creates the choice solution for modern site lighting applications. The Icon luminaires gentle curves and sleek profile create a shape that is beyond common. Two unique arm choices combined with structural element options provide no limitations in bridging to the architectural application.

Catalog #		Type	
Project

SPECIFICATION FEATURES

Construction

HOUSING: Heavy-wall, one-piece, die-cast aluminum housing has precise tolerance control and repeatability in manufacturing. Integral aluminum heat sink provides superior heat transfer in +40°C ambient environment. **DOOR:** One-piece, die-cast aluminum construction with tool-less release latch. Door swings down and is retained on heavy duty leaf/pin hinge. **GASKET:** Continuous gasket provided to seal housing to door. **HARDWARE:** Tool-less release button latches are stainless steel/aluminum construction, painted to match housing and allow access to internal housing and electrical components.

Optics

Choice of twelve patented, high-efficiency AccuLED Optics™ distributions. Optics are precisely designed to shape the light output, maximizing efficiency and application spacing. AccuLED Optics technology creates consistent distributions with the scalability to meet customized application requirements. Offered Standard in 4000K (+/- 275K) CCT and minimum 70 CRI. Optional 3000K CCT, 70 or 80 CRI. For the ultimate level of spill light control, an optional house-side shield accessory can be field or factory installed. The house-side shield is designed to seamlessly integrate with the SL2, SL3 or SL4 optics.

Electrical

LED drivers mount to die-cast aluminum back housing for optimal heat sinking, operation efficacy, and prolonged life. Standard drivers feature electronic universal voltage (120-277V 50/60Hz), 347V 60Hz or 480V 60Hz

operation. 480V is compatible for use with 480V Wye systems only. Greater than 0.9 power factor, less than 20% harmonic distortion, and is suitable for operation in -40°C to 40°C ambient environments. All fixtures are shipped standard with 10kV/10kA common – and differential – mode surge protection. LightBARs feature an IP66 enclosure rating and maintain greater than 95% lumen maintenance at 60,000 hours per IESNA TM-21. Occupancy sensor and dimming options available.

Mounting

UPSWEEP ARM: Manufactured of heavy-wall cast aluminum. Internal bolt guides provided for positioning arm to housing and pole. **LINEAR ARM:** Manufactured of heavy-wall extruded aluminum. Arm features internal bolt guides for positioning arm to housing and pole. **STRUCTURAL MOUNT:** Die-cast aluminum cleat, factory mounted and finished in luminaire color. Stainless steel structural rod measures 1/2" in diameter and is provided in luminaire finish or optional natural finish. Product functions in conjunction with linear arm. Invue poles provided pre-drilled for suspension mount applications. See Invue pole brochure for complete selection of matching poles. **STRUCTURAL WALL MOUNT:** Die-cast aluminum cleat, factory mounted to luminaire and finished in luminaire color. Stainless steel structural rod measures 1/2" in diameter and is provided in luminaire finish or optional natural finish. Wall bracket works in conjunction with linear arm. Mounting arms ordered separately.

Slide Arm

An elegant cantilever arm assembly articulates the Icon housing in suspended balance. The extended aluminum arm and rear suspension detail in conjunction with the flowing lines from pole to luminaire provide a dramatic form where excitement in architectural design is desired. Arm weldment assembly manufactured of 6061, 6063 cast aluminum subcomponents. The medium Icon arm (SDM) assembly mounts to a 5" O.D. round straight pole equipped with a 4" O.D. by 10" tall tenon. The Small Icon Arm (SDS) Fits 4" O.D. tenon or slipfits over 4" round straight pole. Arm secures to pole with provided stainless steel hex head fasteners and includes a removable side cap for wire access and inspection.

Finish

Housing is finished in five-stage super TGIC polyester powder coat paint, 2.5 mil nominal thickness for superior protection against fade and wear. LightBAR cover plates are standard white and may be specified to match finish of luminaire housing. Standard colors include black, bronze, grey, white, dark platinum and graphite metallic. RAL and custom color matches available. Consult Outdoor Architectural Colors brochure for a complete selection. Options to meet Buy American Act requirements

DESCRIPTION

The Invue Arbor post top brings architectural style to area/site and pedestrian scale applications. Its dayform appearance brings a desired organic look into the urban environment. WaveStream LED Optics provide a uniform pixelation free image, managing glare while providing high levels of visibility.

Catalog #		Type	
Project			
Comments		Date	
Prepared by			

SPECIFICATION FEATURES

Construction

Two-piece IP66 rated housing is cast from low copper content corrosion resistant aluminum, maintaining strength and precision to sustain long term dayform appearance. ANSI C136.31 testing compliance prevents damage from installation generated vibration. External hardware and casting seams are minimized to enhance appearance.

Optics

Specifically designed for pedestrian applications, WaveStream LED optical waveguide technology produces both symmetric NEMA type V and asymmetric NEMA II, III, IV distributions. The waveguide is manufactured from precision injection molded acrylic resulting in a pixelation free optical image for improved glare control and visual comfort. Luminaire efficacy's measure up to 100 lm/w for 4000K (+/- 275K) CCT at 70 CRI (min), optional 3000K CCT at 80 CRI is also available.

Electrical

LED driver(s) are directly mounted to upper housing thermal pad for optimal thermal performance.

Standard 0-10V dimming drivers and Cooper Lighting Solutions' proprietary surge protection module are designed to withstand 10kV of transient line surge. Drivers operate at 120-277V 50/60Hz with 347V/60Hz or 480V/60Hz operation optional. Suitable for ambient temperature applications as low as -40°C (40°F) to 40°C (104°F). Limited high ambient options allow for 50°C operation.

Controls

The Arbor LED luminaire control options are designed to be simple and cost-effective ASHRAE and California Title 24 compliant solutions. The ANSI C136.41 compliant NEMA 7-PIN receptacle enables wireless dimming when used with compatible photocontrol. See control options page for more details.

Mounting

Fitter assembly mounts over 2-3/8" O.D. tenon and is secured via six concealed stainless steel set screws. Design of fitter provides seamless transition to 3" O.D. round pole top. Additional mounting accessories include a single fixture arm mount, twin

fixture arm mount and wall mount arm. Additional pole mount accessories mount to a 3" x 4" long tenon for 4" - 5" O.D. poles tops. For existing 2-3/8" tenons an adapter is shipped standard.

Finish

Cooper Lighting Solutions ("CLS") utilizes premium ultra-weatherable TGIC based polyester powder coatings that are specifically formulated to withstand extended outdoor exposure. The powders are formulated exclusively for CLS to serve functionally as well as decorative. Good film appearance combined with excellent mechanical an exterior exposure qualities display greater than twice as much gloss retention. RAL and custom color matches available. Finish is compliant with ASTM B117 3000hr salt spray standard. Options to meet Buy American Act requirements.

Warranty

Five-year warranty.

BUY AMERICA ACT C US

FEATURES & SPECIFICATIONS

INTENDED USE — Typical applications include corridors, lobbies, conference rooms and private offices.
CONSTRUCTION — Galvanized steel mounting/plaster frame; galvanized steel junction box with bottom-hinged access covers and spring latches. Reflectors are retained by torsion springs.
 Vertically adjustable mounting brackets with commercial bar hangers provide 3-3/4" total adjustment.
 Two combination 1/2"-3/4" and four 1/2" knockouts for straight-through conduit runs. Capacity: 8 (4 in, 4 out). No. 12 AWG conductors, rated for 90°C.
 Accommodates 12"-24" joist spacing.
 Passive cooling thermal management for 25°C standard; high ambient (40°C) option available. Light engine and drivers are accessible from above or below ceiling.
 Max ceiling thickness 1-1/2".

OPTICS — LEDs are binned to a 3-step MacAdam Ellipse; 80 CRI minimum. 90 CRI optional.
 LED light source concealed with diffusing optical lens.
 General illumination lighting with 1.0 S/MH and 55° cutoff to source and source image.
 Self-flanged anodized reflectors in specular, semi-specular, or matte diffuse finishes. Also available in white and black painted reflectors.

A+ CAPABLE LUMINAIRE — This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning when used with Acuity Brands controls products. All configurations of this luminaire are calibrated and tested to meet the Acuity Brands' specifications for chromatic consistency – including color rendering, color fidelity and color temperature tolerance around standard CIE chromaticity coordinates. To learn more about A+ standards, specifications, and testing visit www.acuitybrands.com/aplus.

UGR — UGR is zero for fixtures aimed at nadir with a cut-off equal to or less than 60deg per CIE 117-1996 Discomfort Galre in Interior Lighting. [UGR FAQs](#)

ELECTRICAL — Multi-volt (120-277V, 50/60Hz) 0-10V dimming drivers mounted to junction box, 10% or 1% minimum dimming level available.

0-10V dimming fixture requires two (2) additional low-voltage wires to be pulled.

LUMEN MAINTENANCE — 70% lumen maintenance at 60,000 hours.

LISTINGS — Certified to US and Canadian safety standards. Wet location standard (covered ceiling). IP55 rated. ENERGY STAR® certified product. Drivers are ROHS compliant
